The Wireless Bluetooth Phone and Key Tracker is the solution to keep you from leaving your iPhone or valuables behind. The wireless tracker creates a link with your iPhone so that anytime your phone and the tracker are separated, both the tracker and your phone would vibrate and produce an alarm sound.

The tracker is based on the latest Bluetooth 4.0 Low Energy technology, so the lightweight compact tracker is extremely energy efficient. Under normal usage, the tracker can be used for about one year before the need to replace the battery.

The tracker comes with a free companion app which you can download from the iTunes store. The app allows you full customizations, such as selecting alarm sounds for the tracker.

## **ALERTS**

If you forget and leave your iPhone/iPad behind, the tracker reminds you by vibrating and/or producing an alarm sound. Or, if the tracker is attached to your keys and you leave your keys behind, the iPhone/iPad will sound an alarm to alert you.

### LOCATES

Forget where you have placed your phone? Simply press the button on the tracker and your phone will sound an alarm. Or if you have misplaced the tracker, press the "Find Tracker" button on the app and the tracker alarms with sound and/or vibration.
