

Aluminum Bluetooth Keyboard Case for the New iPad (3rd gen) and iPad 2

IPA6000

The new all-in-one Aluminum Bluetooth Keyboard Case is the perfect keyboard case for your New iPad (3rd gen) and iPad 2. The keyboard case features a sleek and stylish brushed aluminum finish that matches the New iPad (3rd gen) and the iPad 2 perfectly, with an integrated keyboard that pairs with the iPad quickly and easily over Bluetooth. Precision-cut aircraft-grade aluminum and high-density padding at every corner protect and cushion the screen and sides of the iPad while in carrying-case mode.

To use the built-in keyboard, simply remove the iPad from the case and place it in a vertical or horizontal position; perform a quick Bluetooth sync with the keyboard and it's ready for use. The keyboard's comfortable, highly tactile response, gives it the same look and feel of a standard laptop keyboard. For multi-tablet households or office environments, the keyboard function is also compatible with any other Bluetooth-enabled device.
