

USB-C to HDMI / DVI / VGA Display Adapter

P/N: USBC2HDMDVIVGA

This USB-C to HDMI, DVI, VGA display adapter allows you to connect your computer's USB-C port to a display monitor with either an HDMI, DVI, or VGA connection.

Specifications

- Input: Computer with a USB-C port
- Video Output:

Output: single display only

USB 3.1
Type-C

HDMI	up to 3840 x 2160 (4K)
DVI	up to 3840 x 2160 (4K)
VGA	up to 1920 x 1080 (1080p)

! The adapter is designed to be connected to a single display. The adapter transmits video signal through only 1 output port: HDMI or DVI or VGA.

- If the HDMI or VGA or DVI port is connected to an active display, video will transmit via the connected port
 - If both HDMI and VGA output ports are connected to active displays, video will only transmit via the HDMI port
 - If both VGA and DVI output ports are connected to active displays, video will only transmit via the DVI port
 - If both HDMI and DVI output ports are connected to active displays, video will not be transmitted correctly to either displays. Please remove the HDMI or the DVI connection from the adapter.
- Audio Output – via the active HDMI video signal
 - Plug and play; no software needed
 - 1 year limited warranty
